HAL is a multi-disciplinary open access archive for the deposit and dissemination of scientific research documents, whether they are published or not. The documents may come from teaching and research institutions in France or abroad, or from public or private research centers.

L'archive ouverte pluridisciplinaire **HAL**, est destinée au dépôt et à la diffusion de documents scientifiques de niveau recherche, publiés ou non, émanant des établissements d'enseignement et de recherche français ou étrangers, des laboratoires publics ou privés.

SHOULD I TRUST THIS IMAGE ?

Help me !

Is this image forged ?

Can I find similar images?

Query

Candidate 1

Candidate 2

Candidate 3

Candidate 4

Candidate 5

How these images differ?

Detecting the outliers

Query

Selected candidate

Estimated homography

Outliers

Transforming the outliers into a binary map

Outliers density map (DM),
gaussian kernel

Binarized DM
($\theta = 0.50 \times \max$)

Binarized DM
($\theta = 0.75 \times \max$)

Binarized DM,
uniform kernel

Ground truth

Ok, and then, what can be said?

Modifications characterization

Detected area extraction
($\theta = 0.50$)

Type of modification:

Text

Shape

Person

Other

Which one is the original image?

Is there any visual information relevant to identify the original image?
